SUBJECT - Statewide Blanket Proprietary Item Request for Anvil Anchor Deck Inserts  
GSP 6-02.2.OPT46(A).GB6

As a steward for the public interest, the Bridge and Structures Office certifies blanket proprietary item approval for the 2025 – 2027 biennim for Andvil Anchor Deck Inserts for the use of hanging utility and associated items from the bottom of bridge decks.

The WSDOT Bridge and Structures Office Utility Specialist has reviewed other commercial products and no other equally suitable alternative exists. The concrete insert as listed above from Anvil International is currently the only known bridge deck insert that fits a rod diameter greater than 7/8 inches and meets WSDOT Bridge and Structure office's corrosion resistance requirements. The larger diameter rod is required for bridge under-deck utility hanger systems for large diameter utilities such as fourteen inch or larger gas or water lines

If you have any questions concerning this request, please call Steve Thomson at 360-705-7219..

I, Amy Leland, State Bridge Design Engineer, of Washington State Department of Transportation, do hereby certify that no equally suitable alternative exists for this patented or proprietary item.

*Amy C. Leland*
