Washington State Department of Transportation Ferries Division Submitted via email to CSOSubmittals@wsdot.wa.gov

Re: SR 160/Southworth Terminal—Terminal Building and Trestle Replacement Program

Dear Selection Committee,

Washington State Ferries' (WSF) ridership is expected to grow more than 30 percent by 2040, climbing to nearly 32 million passengers a year. The facilities at Southworth Ferry Terminal have aged beyond their useful life and need to be replaced to maintain reliable service. This includes improvements to the terminal building and replacement of the existing trestle. With an increase in need for workforce support, WSF will need a General Engineering Consultant (GEC) that can help WSF deliver these important projects.

We have organized our proposed GEC team to provide any and all functions that may be required for program development, but at the same time understand that WSF will contract with the GEC team on an as-needed basis, with specific tasks implemented along the way. The GEC team intends to provide continuous leadership to the program, and to staff specific tasks and projects with a selection of proposed team members that is appropriate at each phase of development. We understand that the focus of the GEC team will be the first two projects of a multi-phase program, but also that the longer term GEC nature of the contract means that we will stand ready to support any additional phases of the Southworth program that are pursued in the future.

Our team begins with Project Manager, Jeff Kilborn, SE, who has worked extensively on WSF projects since 1997, including several previous offshore structures at Southworth and projects at 15 different WSF terminals. Jeff has assembled a team that includes staff with past WSF and WSDOT experience, specifically those with an extensive understanding of the agency's building and offshore structures facilities, including the redevelopment of WSF's Seattle Ferry Terminal Multimodal Terminal at Colman Dock.

The WSP team includes 17 subconsultant firms with specialized expertise (11 of which are DBE-certified), that will support both the terminal building and trestle replacement projects and bring expertise in all of the subject areas that WSF has identified for this GEC. Our extensive previous subcontracting success on WSDOT or other agency GEC programs indicates that we will successfully deliver the best project partners available over the longer term of this program. We are committed to meeting the 13% DBE goal set in the RFQ.

Our robust team brings the depth of resources needed to deliver this program. WSP has experience managing WSDOT on-call and GEC contracts dating back to 1988. To facilitate WSF's goal to integrate more completely into WSDOT processes, we intend to access that extensive WSDOT project management experience to guide the GEC team, and the WSF project manager, in the processes of WSDOT.

We are excited to continue our relationship with WSF and collaborate on the Southworth Ferry Terminal program. Should you have any questions regarding our submittal, please contact us at (206) 431-2392 or via email at Jeff.Kilborn@wsp.com.

Sincerely,

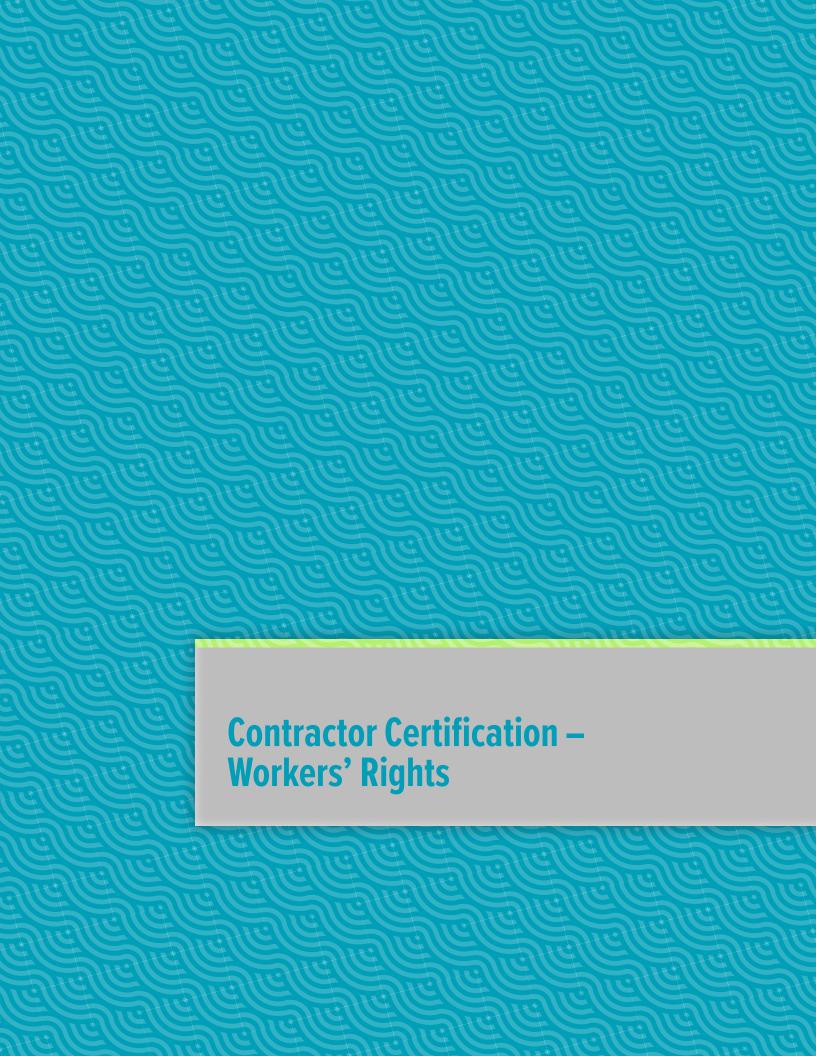

Jeff Kilborn, SE

P. John
