City Wide Pedestrian Improvements

The first part of this project includes flush mount barrier lights, wiring, conduit and wiring from an existing power source and capacity for future pedestrian lights on SR 411 (PH-10) Bridge over the Cowlitz River to the west. The second part includes updating school zone lights, adding speed read out displays and the construction of bulb-outs at key intersections where pedestrian activity is high and visibility of pedestrians is needed. The third part of this project includes installing a pedestrian activated crosswalk signal at the intersection of SR 411 (A Street SW) and Huntington Ave. South and the continuation of a sidewalk section from this same location, along SR 411 (Huntington Ave.) to Cowlitz Street to fill in a missing gap of sidewalk along this arterial street that connects to the downtown business and service area.

Huntington Avenue S. Roundabout

An intersection improvement along Huntington Avenue S. at the future entrance into the Landing on the Cowlitz development. The conceptual roundabout will require additional right-of-way from neighboring properties for construction. The proposed improvements include a single-lane roundabout with center landscape island and a concrete truck apron to accommodate maneuvering of large truck traffic through the intersection from the Landing on the Cowlitz development. Widening of Huntington Avenue S. including asphalt, curb and gutter, concrete sidewalk, signing, striping, stormwater management, and landscaping improvements are proposed with this project.

Kalama Crossing-Pedestrian Overpass

Replace the existing 1970's circa pedestrian overpass across the BNSF rail line between the Port of Kalama and Downtown Kalama with a new ADA accessible pedestrian overpass.

The current overpass spans 105 feet across the main BNSF rail line. It is not ADA accessible, nor does it provide access for bicycles. The steps are steep and grated steel, presenting users with open ground visibility. The steep and exposed nature of the steps creates an unpleasant user experience. The Port of Kalama has developed bustling waterfront recreation and commercial attractions, attracting a large volume of local citizens and tourists. These customers are also attracted to Downtown Kalama commerce. This growing popularity has created a parking deficit, especially for events and the busiest recreation/tourism months (April-September).

Safe, attractive pedestrian access between the Port of Kalama and Downtown Kalama will spur economic development and tourist activity on both sides of the railroad.

Auburn Way S (SR-164) - Hemlock to Poplar

The project will widen Auburn Way S between Hemlock St SE and Poplar St SE to accommodate two lanes in each direction, center turn lane and/or medians to provide access management where feasible, sidewalks, bus pull-outs, street lighting and storm improvements. The project will also add an eastbound turnaround and enhanced pedestrian crossing near Redwood Court. The project length is approximately 0.5 miles. The project is needed to provide additional vehicular capacity, transit, and non-motorized facilities on the corridor. The scope omits portions of the project that are being built by the Auburn School District's (ASD) Chinook Elementary replacement project. ASD's project will construct a roundabout at the school driveway on Auburn Way S instead of the traffic signal originally included in the scope of the City's project.

2023-2024 Vehicle Preventive Maintenance

This project contains Section 5307 funding for preventive maintenance work on the agency's fleet of fixed route and para transit vehicles. Typical work includes performance of inspections and routine maintenance such as changing belts, hoses, distributor parts, oil changes, and tune-ups. This work also includes service on electric vehicles as it is expected that approximately 78% of Everett Transit's fixed-route fleet will be electric by 2025. This work is scheduled for 2024 and 2025. This project uses 5307 equity funding (FY23 \$489,587; FY24 \$494,481) and 5307 earned funding (FY24 \$1,267,375). This project supports approximately 9000 labor hours annually.

Pacific Highway Non-Motorized Corridor - 16th Ave S (S 308th St to S 288th St)

Construction of a shared-use path along Pacific Hwy S from S 308th St to S 288th St. The non-motorized improvements include a path/trail that for portions of the alignment will parallel the roadway and portions will be located within the (partially unopened) right-of-way for 16th Ave S. The segments of the trail located off-roadway will include pedestrian-scale illumination for safety. The project will include traffic calming, pedestrian crossing improvements, and bulb-outs. Phase 1 will include a compact roundabout at 304th trail crossing. Phase 1 also includes signal modifications for pedestrian movements including scramble phase. The project will be constructed in two phases. Phase 1 of construction is programmed and will be on 16th Ave S from S 304th to Dash Point Road. Phase 2 is programmed and will include S 308th St to S 304th St and Dash Point Rd to S 288th St. This is a multi-year project, and the programming reflects the funds available within the span of the regional TIP.

58th Avenue E and Valley Avenue E Roundabout

This project will construct a single lane roundabout at the intersection of Valley Ave and 58th Ave. The roundabout will provide traffic calming and improve safety and mobility for all travel modes at the intersection. The roundabout will have an approx. 100' inscribed diameter with splitter islands on each approach. The center island will have a mountable apron to accommodate school and transit buses. The project will construct curbs and sidewalks at the intersection. Each leg of the intersection will include a marked crosswalk with an island refuge that will allow pedestrians to cross one direction of traffic at a time. The east and west leg crosswalks on Valley Ave will include RRFB systems. The project will include sidewalk segments on all intersection approaches. The project will construct bike lanes along Valley Ave through the intersection. The project will add additional lighting at the intersection.

FY 24 Capital Preventive Maintenance

This is a new bucket project that will provide for Capital Preventive Maintenance (CPM) eligible operating expenses for FFY 2024. Reimbursement will be based on the PSRC Earned Share STE UZA 5307 formula funds based on the proportion of revenue miles of Intercity Transit public transportation service to and from the STE UZA reported in NTD statistics for fixed route express coach service and vanpool service. This funding will be used for approximately 6% of eligible CPM expenses. The project consists of FTA funds scheduled to be expended over the span of FFY 2024.

NW Gilman Bridge Seismic Retrofit

This project will seismically retrofit NW Gilman Bridge over Issaquah Creek. Seismic evaluations determined the bridge does not meet current seismic standards. The project proposes to meet these standards by installing additional shafts/columns as well as wrapping existing columns and girder ends with composite material. The additional columns are needed for lateral support and as a result will widen the bridge.

RapidRide K Line

This project supports design of a new RapidRide line connecting Totem Lake to Eastgate via Bellevue. This project would improve the attractiveness of transit between two regional growth centers and include the following elements: New transit only or BAT lanes on existing or new right of way along 15% of the proposed routing to maintain high transit travel speeds; Major intersection investments at 6-8 intersections to improve traffic flow, transit reliability and increase transit speeds; New transit signal priority at more than 70% of the signalized intersections along the route; upgraded passenger amenities with better information and passenger safety to facilitate greater transit use and remove barriers of existing use by building 28 RapidRide station, 18 Enhanced RapidRide stops, and 6 standard RapidRide stops.

Vehicle, Equipment and Facilities Maintenance 2025-2026

This is a TIP bucket project that contains King County Metro Transit's FTA funded preventative maintenance of transit-related vehicles, equipment and facilities. The project contains the annual program of maintenance work on Metro's fleet of approximately 1,400 buses, vanpool fleet, and seven operating bases and other facilities that are necessary for the maintenance and operations of Metro service. The primary use of the funds is for staff costs for Preventive Maintenance activities on buses. Depending on the amount of federal funds programmed, the federal amount could represent from 20 to 50 percent of the annual budget for this activity. The project includes PSRC FTA funds already expended or scheduled to be expended over the span of FFYs 2025-2026.

Local Electric Passenger Only Ferry

This project replaces an aged diesel vessel with a new environmentally beneficial battery-electric passenger-only ferry and necessary charging infrastructure to carry passengers across Sinclair Inlet, between Port Orchard and Bremerton. The new all-electric design-build ferry will be a sistership to the hybrid-electric M/V Waterman. This project will ensure continued service reliability, maintain a state of good repair and, by improving air quality, advance environmental justice in Kitsap County Washington. Local funds are match for the 5307(h).

POF Terminal Docking Facility on the Seattle Waterfront

This project will lead to the establishment of a new passenger-only ferry (POF) regional docking facility in Seattle with a greater capacity for both new and existing POF routes. Work supports effective operation of planned and existing Kitsap Fast Ferry service and may share future POF docking with other agencies. POF service provides faster transportation options for people traveling between the Kitsap Peninsula and downtown Seattle. The project includes the planning, environmental planning/permitting, and preliminary engineering phases associated with constructing a new POF docking facility. Construction would commence after these phases are fully completed.

North Bend 202/Mt Si Roundabout

Improvements to the intersection of State Route 202 (Bendigo Boulevard South) and Mount Si Boulevard will include, removal of an existing traffic signal, construction of a roundabout, improvements to non-motorized elements: bike lanes, sidewalks and bringing the intersection into compliance with American with Disabilities Act (ADA) standards with rapid flashing beacons, and audible pedestrian crossings. The area needs improved safety and mobility which can be provided by a roundabout. The project site is in a local commercial center located one block from a popular I-90 interchange. It is adjacent to a mall but does not allow access for drivers who have exited I-90. The intersection experiences large and unpredictable traffic and pedestrian volumes that fluctuate greatly due to buses, and traffic coming to and from Snoqualmie Pass. The roundabout will cause lower vehicular speeds and same direction traffic increasing vehicular safety.

Shuttle Revenue Vehicle Replacement 2027

Pierce Transit will purchase approximately 18 shuttle revenue vehicles to replace rolling stock at the end or reaching the end of its useful life. The shuttle vehicles are for Pierce Transit's ADA Paratransit service. ADA shuttles increase mobility and accessibility for people with disabilities and serve as connecting points to other public transportation systems around the region. The Equity funds are needed as currently there are no other identified funds that will be used for the shuttle vehicle replacements. If Pierce Transit moves other resources to cover the cost of this project, other projects will also experience significant delays due to being underfunded. If Pierce Transit would not perform its ADA services optimally with new shuttle vehicles, then Pierce Transit will experience a loss in income from its ridership.

Regional Transportation Planning and Programming, FY28-29

Continue support for regional comprehensive planning and implementation programs addressing the federal, state and regional requirements for all transportation modes for tasks to be identified in the FY 28-29 PSRC Work Program. This includes maintaining and refining aspects of the transportation plan, facilitating the achievement of the plan's strategic components and ensuring consistency with all local, regional and state policies and plans. This also includes tasks which complement and assist transit agencies in the region in advancing planning on transit-related topics at the regional scale which will be the focus of the future 5307 funds in the project. In addition, data collection and analysis efforts necessary to support the plan and other regional transportation and growth management analysis activities will be included.

Rural Town Centers and Corridors--Planning & Capital Program

Continue PSRC's Rural Town Centers & Corridors program, as established by PSRC in Oct. 2003. Projects for planning and implementation tasks will be recommended through a collaborative process involving the four countywide organizations, WSDOT, and the PSRC boards. Eligible geographic areas are (1) incorporated rural town centers and unincorporated rural community centers outside the region's contiguous UGA boundary; (2) other town centers inside the contiguous UGA but which also include portions of a rural highway corridor. The funds in this TIP project are a placeholder until grant competition is held.

Federal Way Link Extension

Engineering (including NEPA), design and construction to extend light rail approximately 7.8 miles from Angle Lake Station (SeaTac) to the Federal Way Transit Center. The alignment is adjacent to I-5 and includes 3 stations: one near Highline College in Kent/Des Moines, one station at S. 272nd, and one station at the Federal Way Transit Center. Parking will be built at each of the three stations. This project is anticipated to be financed with an FTA Full Funding Grant Agreement and federal TIFIA Master Credit Agreement loan. Per Sound Transit's FFGA with the FTA, the total federal funds awarded is \$790M and includes a total baseline cost estimate of \$3.16B. Sound Transit's cost estimate for the FWLE project is \$2.45B, which does not include the additional contingency FTA required for the FFGA. When the TIFIA loan is executed, a total of \$629,472,431 in TIFIA loan disbursements will be available 2019-2024. This is a multiyear project and the programming reflects the funds available.

I-405 Bus Rapid Transit

Establish Bus Rapid Transit from Lynnwood Transit Center to Burien Transit Center via I-405 & SR 518. Service will operate primarily in express toll lanes and direct access ramps on I-405. From Tukwila to Burien, service will operate in both bus-only and general-purpose lanes. Scope includes the new South Renton Transit Center (SRTC); 10 BRT stations, 3 of which add 1,300 new parking spaces; and interchange and station access improvements. The project requires at least 33 buses for operation. CMAQ funds will purchase up to 19 buses and construct the SRTC. FTA 5307 equity funds will purchase 8 battery electric high-capacity transit buses. Reconnecting Communities funds will construct Tukwila International Blvd BRT Station with pedestrian bridges, and SRTC with elements such as signal prioritization, bus-only lanes, and non-motorized improvements. This is a multi-year project and the programming reflects the funds available within the span of the current TIP.

Operations and Maintenance Facility South

This project will construct and operate a light rail operations and maintenance facility in its South Corridor (OMF South). The facility would meet agency needs for an expanded fleet of light rail vehicles (LRVs). OMF South would be used to store, maintain, and deploy a minimum of 144 LRVs for daily service. OMF South would include three primary buildings: the Operations and Maintenance Facility (OMF) building, Maintenance of Way (MOW) building, and the Link System-Wide Storage building. FY2023 funds will be used for preliminary engineering. FY2025, 2026, 2027, and 2028 funds will be used for final design needed for the project. This is a multiyear project and the funding programmed reflects the funds within the span of the TIP.

E Portland Ave (64-72) Overlay

The East Portland Avenue project will carry out a grind & overlay of this principal arterial from the intersection at E 64th St to the Intersection at E 72nd St with channelization potentially extending beyond each intersection as needed. This is necessary maintenance and will extend the pavement life cycle and preserve the roadway, serving general, transit, and freight traffic for years to come. Sidewalks currently exist on both sides of Portland Ave to facilitate non-motorized use and this project will allow the City to improve accessibility and pedestrian crossings to meet the needs of all users and ADA compliance. Further coordination and outreach regarding the potential addition of bike facilities via channelization as a part of this project (for its extents) will take place to ensure all stakeholders are involved, but the City's Transportation Master Plan currently calls for bike lanes to be installed along the entirety of the East Portland Avenue corridor.

Terminal Electrification - Mukilteo - Clinton Route

This project is the Terminal Electrification of the Mukilteo - Clinton Route. This project will support the ship-to-shore rapid charging system (RCS) located on the new Hybrid Electric Olympic Class (HEOC) ferries through the design and installation of a medium voltage power system running from the utility substation to the vessel mooring facility at the Clinton Terminal. This project will support the operation of full battery electric powered (HEOC) ferries that are being constructed to serve the route. The goal of the project is to ensure that charging infrastructure is available at the Clinton Terminal to allow HEOC vessels to achieve their full emissions reduction potential.

Terminal Electrification - Seattle and Bainbridge Island Terminals

This project is the Terminal Electrification at the Seattle and Bainbridge Island Terminals. The project consists of improvements that provide a ship-to-shore charging interface with installation of shore-side service improvements that support medium-voltage charging stations at both terminals. This includes construction of conduits, vaults, power cables, service connection, transformers, switchgear, energy storage systems, and other supporting equipment. This project supports full hybrid-electric propulsion for the Jumbo Mark II (JMI) class ferries serving the Seattle-Bainbridge route that are currently being converted to hybrid-electric propulsion systems under TIP Project #WSF-116.

Vessel Passenger Space Refurbishment

This project will enhance the passenger spaces on up to six of the vessels in the WSF fleet built in the late 1970s and early 1980s. This includes new deck coverings and additional bathroom fixtures, updated piping, replacing the supporting underlayment, bulkheads, and overheads that are outdated and prone to catching dirt. This will allow WSF to maintain a greater level of sanitation and make the passenger spaces more attractive for use while returning passenger amenities to a state of good repair.

The project also will replace sidewalk timbers on Spans D, E, F, G, H and I of the bridge. This is a multi-year project, and the programming reflects the planned expenditure schedule within the span of the current TIP.

Stafford Avenue Sidewalk and SR 903 Speed Camera

Project will construct sidewalk on the east side of Stafford Avenue which has no pedestrian facilities north of Second Street. Many pedestrian facilities intersect at Stafford Avenue and Second Street including the Coal Mines Trail, Second Street Pathway, the Central Business District walking route, and the school walking route Progress Pathway. Adding a connection from the existing Third Street sidewalk to the Stafford and Second Street intersection will provide a much-needed safe walking access to the adjacent neighborhoods. Speeding has been a hazardous issue on SR 903 near the Cle Elum Roslyn High School, Middle School and Elementary. With multiple crossings to nearby neighborhoods, it is crucial the posted 25 mph speed limit is adhered to by motoring public. A speed camera with photo enforcement capabilities will help enforce the speed limit. Project is fully funded with federal funds utilizing Toll Credits for local match.

I-90/Price Cr Vic to Cabin Cr I/C Phase 4 - Add Lanes/Wildlife Bridges

Construct six lanes and wildlife bridges on new alignment. The original concrete pavement on this section of I-90 east of Snoqualmie Pass is severely deteriorated and needs to be replaced. Existing low clearance bridges over the highway create hazards for oversized loads. Drivers also experience stop-and-go traffic conditions due to increasing traffic volumes and collisions, including collisions with wildlife. This project will reconstruct I-90 on a new alignment and add a third lane in each direction to add capacity, improve sight distance, provide a smoother ride, replace rapidly deteriorating pavement, and increase vertical clearance for oversized loads. The project will also construct new wildlife crossings to improve habitat connectivity and reduce collisions with wildlife.

Blackburn Road Extension Planning (Little Mountain Road to Eaglemont Drive)

Pre-design planning to determine preferred horizontal and vertical alignments for a new new minor arterial complete street roadway connecting Little Mountain Road with Eaglemont Drive. Project will be designed to current minor arterial complete streets standards. This project, when constructed, will provide a new, direct, east-west transportation corridor to the rest of the City and I-5 for existing and future neighborhoods in the southeast areas of the City of Mount Vernon and surrounding County. As this area is anticipated to see additional residential growth and development, this new corridor will be required to provide direct access that does not currently exist.

Skagit River Pedestrian Bridge - Study

Construct a pedestrian-bicyclist only bridge over the Skagit River to connect the residential neighborhoods of Mount Vernon and unincorporated Skagit County west of the river with downtown Mount Vernon. This bridge will provide a safer route for pedestrians and bicyclists than the current Division Street bridge allows, due to the limited size of the existing bridge. A feasibility study will be performed first to determine location of bridge landings and architectural/engineering design characteristics. The study will also develop a funding strategy for the project.

Scale slopes, install rockfall fence, netting, bolts, barrier; Slope 551. WSDOT's geotechnical division has identified this unstable slope as a potential hazard to the traveling public based on recorded vehicle/ rock collisions and repeated call-outs to remove rocks from the roadway. This project will remove loose rocks, install rock bolts, wire mesh, concrete barrier, and flexible rockfall fence. These measures will reduce the potential for collisions by minimizing the risk of rocks reaching the roadway.

I-82/Yakima to Union Gap - Corridor Improvements

Improve access, provide capacity, and replace bridges. I-82 in the Yakima vicinity has become increasingly congested with heavy morning and afternoon rush hour traffic mixing with heavy truck traffic. Retail and commercial development in the greater Yakima area continues to add to freeway traffic. This project will increase capacity on I-82 between the US 12 interchange and the SR 24/Nob Hill Blvd interchange, replacing bridges, and improving on/off connections. This project in conjunction with related City of Yakima and Yakima County system improvements will reduce congestion and the risk of crashes.
